Vol. 30 FRIDAY, JULY 17, 1931 No. 19

Large Crowd at Taylor Stake Track Meet

Review of Parliament

(By Thomas Wayling)

Ottawa, July 14.—The attitude of amazement with which Canada greeted the Bennett Budget, and of astonishment at the arbitrary tariff changes of the emergency session, has been succeeded by one of entire bewilderment. Mr. Bennett's Budget has undergone so many changes that it is like the railway foreman's famous message about the derailed train: "Offagin, Onagin, Awayagin, Finne-gan."

If ever there was a shotgun budget, this was it. Instead of choosing carefully the targets which the new tariff and taxation proposals were to hit, Mr. Bennett simply loaded the gun to the muzzle, shut his eyes and fired. Since then, he has been busy picking out the shot which hit the wrong targets, amid the muttered anathemas of the innocent victims.

On Sales Tax, Magazine duties, Dividend Taxes, Income Taxes, Excise duties, Glass duties, Binder Twine duties, Automobile valuations, general valuations for duty purposes, Nurseries, stock duties, Insurance taxes, Air Mail votes, and many other imposts have been changed since the Budget came down or since the changes were made by order-in-council. There has never been a Budget which was so badly made and so woefully patched.

Potatoes were subjected to a weird system of valuation which had to be revised, to save the face of the Minister had to transfer this shot to the poor man's strawberries, the humble radishes. In February Mr. Bennett imposed duties on carrots and cabbage and in April had to take them off, about the same time he had to lift his embargo on potatoes. Last December he imposed duties on celery, stock. He could not even hang on to the duties collected, but announced a rebate and announced the tax would not apply until July 1. Evidently it was to be a Dominion day gift to the young Dominion.

Four times the coal duties have been changed. Last September Mr. Bennett put a high tariff on glass, which proved so ridiculous in its operation and brought such flagrant exploitation of the tariff that he had to take it off in October. He put a tax on binder twine and he had to take it off when the principal binder twine concerns in Canada announced it would have to close down its plant.

The most popular tariff reduction made in a decade was that on automobiles on which the duties were reduced in 1926. These changes proved so popular that Mr. Bennett has not dared to interfere with them directly, but has broken in by the back door and by putting high valuations on cars and limiting the trade discount he boosted the protection higher than ever. Even in that direction he had to retract and has postponed the opposition of the discount limitation.

The high duties imposed on foreign magazines proved the worst boomerang possible. Already one famous American publication costs 10 cents in Canada as against 5 cents in the United States. Many of its writers probably the majority are British. An author will naturally try to get \$1,000 for a story as \$200, and so these magazines assist Canadian and British writers. By the new duties Mr. Bennett raises the price of this magazine to 25c. It is so good that people will buy it anyway, but the real danger comes in the likelihood that the publishers will start publication in Canada. If they do, they will give Canadian magazines worse competition than ever, and will not employ very much Canadian labor at their Canadian plants. The Canadian publishers are between the devil and the deep blue sea. They need protection against competition, but if they get too much protection they will get a competition liable to swamp them. What they need just now is

protection against Mr. Bennett. Curiously enough, Mr. Bennett's plan to keep out salacious and other evil magazines is defeated by his tariff plan, for the good magazines will pay more duty than the wicked ones which do not weigh so much. He has had to postpone this traffic.

Mr. Bennett put a two per cent. tax on dividends paid by Canadian companies to non-resident shareholders. This was on June 1, and by June 27 he had to back up and "Postpone" the imposition of the tax. On the same date he announced an increase in the sales tax from one to four per cent to apply on the wholesale prices. In one week he found he had to change it to manufacturer's price. It was also to apply to raw materials; now it is forecasted that certain raw materials will be exempt.

There was a 1 p.c. excise tax put on all imports, on all goods valued at \$25.00 or more, there being exemption under \$25.00. When the notices went to customs collectors it was found that the exemption applied only when they were shipped by mail or express.

The Liberal Government even with its small 1 c. sales tax, realizes that certain necessities of life should not be taxed. Did Mr. Bennett thus consider the man with the large family and small income. Not he—not at first. There were to be no exemptions. Now comes the announcement by Mr. Bennett himself that the list of exemptions provided by the Liberal government would stand. He made it clearer, that was only a temporary concession, however. Next year he may wipe out those exemptions. The possibility is he will not dare to do so.

There was the tax on insurance companies. Due to the pressing representations of Western Ontario Liberal M. P.'s. Mr. Bennett was constrained to see the injustice that would be done to the Mutual Insurance companies of which there are many in Ontario and Quebec. He has therefore exempted these companies.

The five cent bonus on export wheat still stands as the prime enigma of the Budget. Not a soul knows how it can be applied, and Mr. Bennett has vouchsafed no explanation—if there is any. It may end in the bonus being granted on all wheat or being replaced by some other sop to the western farmer.

The famous promise to end unemployment has of course not been fulfilled. The \$20,000,000 voted at the special session was not even fully expended although the municipalities and provinces were compelled to spend over \$90,000,000 and some of the municipalities are bankrupt as a result. This year unemployment is worse. At the beginning of the session Mr. Bennett said there was no unemployment in Canada. The deficiency has since been supplied, and his Minister of Labour can tell him about them. Yet there is no further effort to end unemployment; nor so far as this session goes, none even to alleviate it. The national highway which might have supplied employment is being washed on the provinces, as are many other promised works. Of the millions that were to be spent, (vide the election promises) not thousands will be forthcoming. Public works throughout the country have been diminished instead of increased. The budget itself that was to be balanced, has proven the most unbalanced budget imaginable, unbalanced not only in a financial sense, but so unbalanced in its constitution that it can only be referred to as the Moron of all the Budgets.

As the Mr. Fielding used to say—They promise, prepare, propose, postpone—and end by letting well enough alone.

News Notes

L. D. King returned from the Calgary Stampede on Sunday.

The more a wise man knows—the less he talks.

O. H. Snow was in Lethbridge on Friday on a business trip for the Town.

Mrs. Ethel Bunnie, whose home is in LeGrande, Oregon, is here for a visit with her parents, Mr. and Mrs. Chas. Evesson and family.

The largest enrollment on record is attending Summer School at Edmonton this summer. 800 were expected to take the course.

Raymond was somewhat of a deserted village on Sunday last when the Geological Convention was in session at Magrath.

King Motors Gasoline Pumps were both freshly painted this week.

Percy Poulsen is installing a Globe Hydraulic Auto Hoist at his Super Service Station.

Mr. and Mrs. Cliff Neilson and family, who have been here for the past year left on Saturday for Portland Ore., where they expect to make their future home.

Archibald F. Bennett and Bishop Joseph Chastanet, who have been conducting the Geological Conventions in the Canadian States, were Raymond visitors for a while on Monday evening on their way to Cardston.

Miss Beartice Nurse and Mr. Ammon Anderson were married in the Cardston Temple July 9th. The bride has just returned from Utah and the groom is well and favorably known here. The Recorder joins with their many friends in wishing them joy and happiness in their matrimonial journey.

W. Sonomura, a Japanese farmer of this district who left here two months ago for Japan, was a passenger on a ship that the Hindu was on who went wild and killed 4 Chinamen and injured 18 before he was overpowered. Mr. Sonomura was stabbed in the left forearm and the stomach, but neither wound was so very serious, and he is O. K. now. The report didn't have much local interest until news came that Mr. Sonomura was among the ones injured by the crazed Hindu.

CARDSTON ROPERS STAR AT CALGARY

FLOYD PETERS FIRST IN CANADIAN TITLE BATTLE—TOM THREE PERSONS' SECOND

(Lethbridge Herald)

Southern Alberta riders and ropers continue to distinguish themselves in the arena at the Calgary Stampede. Among Thursday's winners were the following:

Al Falconer, Cardston, took second money in the Canadian bucking championships with C. M. Lund, Raymond and Lawrence Watrin, High River, tied for third place.

Pete Brulshhead, Blood Indian of Cardston, was third in North American calf roping championships, while in the Canadian championships Floyd Peters of Cardston was first time 25 2-5 seconds; Tom Three Persons, Blood reserve, second, time 25 3-5 seconds; Donald Forsythe, Cardston, third, 28 3-5 seconds; Pat Birdston, Claresholm, fourth, time 30 1-5 seconds.

In the wild cow milking contest George Revier, Pincher Creek, was second, and C. M. Lund, Raymond, third.

BARTHELMESS IN "DAWN PATROL" AT THE CAPITOL

DOUG FAIRBANKS, JR., AND NEIL HAMILTON IN THE CAST OF FEATURED PLAYERS

"The Dawn Patrol," a thrilling First National-Vitaphone drama of the air service starring Richard Barthelmess, is the coming attraction at the Capitol Theatre July 25.

Following close on the heels of such success as "Weary River," "Drag," "Young Nowheres" and "Son of the Gods," the newest Barthelmess production is due to create a sensation and larger fan following than anything he has heretofore done. "The Dawn Patrol" teems with dramatic situations, action, and human interest. It tells the story of a group of young flyers in the early years of the World War. War is not its theme—it serves merely as the background against which the story is told. Barthelmess has painted a vivid picture of the soul struggle of fighting men who so far above the clouds, face the enemy against great odds and in it finds some thing greater than war to make a sacrifice for.

"The Dawn Patrol" was written originally as a screen story by John Monk Saunders, author of "Wings" and other motion picture stories. It was directed by Howard Hawks, brother of the ill-fated Kenneth and himself a licensed pilot. The cast supporting Barthelmess is of superlative calibre including such names as Doug Fairbanks, Jr., Neil Hamilton, Gardner James, Clyde Cook, James Finlayson, William Janney and others.

The postponed Track Meet of the Taylor Stake M.I.A. held on Wednesday afternoon was successful in every phase, and drew a big crowd from Raymond and the surrounding towns. Due to the postponement and the busy season now on, there was not as much competition, especially in the Senior Events as there other wise would have been, and this of course lessened the interest. The program was somewhat late in starting but once started went off pretty well although some delays are unavoidable due to contestants not being ready for the events.

The Raymond Second Ward was away out in lead in the number of points scored, as they had entries in every event, and in a number of the races, etc., no other ward was represented, and of course all the points went to the Second Ward. Magrath had some good entries, Stirling also had some good material, and the other wards were represented to some extent, but the Raymond Second had it over all of the others so much in numbers that there was no competition for first place at all as far as the scoring of points was concerned. Some good records were made in the various events, and in the Standing High Jump for Juniors, Harris Walker bettered the present Provincial record of 3 ft. 10 by 6 inches, clearing the bar at 4 ft. 4 in.

News Notes

Mr. and Mrs. W. D. Mendenhall were Lethbridge visitors Saturday.

Geo. H. Brewerton left on Saturday for a holiday trip to Utah and intermediate points.

Mr. and Mrs. Grant Card were in Lethbridge Saturday afternoon. Grant brought a load of oil home.

T. O. King was at the Stampede in Calgary last week.

Gordon Brewerton and family were Raymond visitors on Saturday last. His daughter Barbara accompanied her uncle George to Utah.

Blue Green Gas was lauded to the skies over CJOOC on Saturday. Out of curiosity a great number of weekend motorists tried it out.

North Battleford Sask., was visited by a cyclone on Friday last which left a path of destruction in its wake and was followed by a torrential rain that lasted for an hour. Damage was estimated at \$180,000 in demolished roofs, broken walls and pulverized windows. No lives were lost.

Stampede Finalists

(Lethbridge Herald)

Cowboy bareback, bucking, horse riding contest, final: First, Canada Kid, \$300; second, Joe Voerman, \$200; third, Hughie Long, \$100; fourth, Geo. McIntosh, \$50.

Cowboys' Canadian championship bucking horse riding contest with saddle: First, Slim Watrin, High River, Prince of Wales trophy and cigarette case and \$750; second, Smoky Snider Kimberley, \$400; Harold Walsh Crossfield, and Joe Fisher, Kew, split the third and fourth money \$175 each.

Cowboys' wild Braham steer bareback riding contest, final money: Smoky Snider, Kimberley, B.C., \$100 cash and the Courtney Ryley Cooper trophy; second, Eddie Woods, Emmett, B. C., \$50; third, Lorne Thompson, Medicine Hat, \$25.

Cowboys' North American bucking horse riding with saddle: First, Gene Ross, Salmonville, Ariz., Hoot Gibson trophy and \$1,300; second, Chuck Wilson, Koycee, Wyo., \$750; third Jack Cooper, Jasper Park, \$300; fourth, Walter Hancock, Burley, Ida., \$100.

Cowboys' North American championship steer decorating contest: First, Oral Zumwalt, Wolfe Creek, Mont., Walt Coburn trophy and \$500; second, Dick Trill, Stonewall, Okla., \$3300; third, A. K. Lund, Raymond, \$100.

Boys' wild steer bareback riding contest, final: First, Gerald Ambler, Wainwright, Messrs. Cowdrey and De Wolf special and \$725; second, Gordon Cecil, Morley, \$15; third, Albert Swain, Wayne, \$10.

Wild cow milking, day money: 1st, Dick Trill, Stonewall, Okla.; second, Geo. Revier, Pincher Creek; third, C. M. Lund, Raymond; fourth, J. W. Gray, Dog Pound.

Cowboys' wild horse race: Geo. McIntosh, High River, won Lombardi trophy for winning greatest amount of day money in the event for the week.

The winners in the events follow:—

Senior 100 Yards Dash—R. Wolsey 10 1/2; H. Walker, B. Galbraith.

Scouts 60 Yard Dash—D. King 7 and 3-10; E. Zaugg, L. Nalder.

Junior Pole Vault—Fay Walker, 7 ft. W. Hawk.

Ladies Broad Jump—Miss Roman 10 ft. 3 1/2.

Senior Shot Put—V. Spaakman 1 ft.; W. Knight.

Senior 220 yd. Dash—R. Wolsey, 2' and 3-10; F. Weaver, W. Knight.

Junior 100 yd. Dash—F. Turner, 1' and 1-10; E. Piegrass, G. Evesson.

Scouts Potato Race—Raymond Second Ward.

Senior 440 yd. Dash—H. Walker, 5' sec.; G. Kirkham, R. Meldrum.

Junior 220 yd. Dash—F. Turner, 25 1/2; G. Rutten, W. Rolison.

Ladies High Jump—M. Galbraith 4 ft 5".

Junior Broad Jump—W. Lafferty 16 ft 2".

Junior Shot Put—W. Lafferty, 20 ft.; Zaugg.

Senior Half Mile Run—C. Scoville 2 min 11 2-5 sec; W. Knight, G. Kirkham.

Ladies 100 yd. Dash—M. Galbraith, 13 and 4-5; A. Zaugg, D. Nurse.

Senior Pole Vault—B. Galbraith, 10 ft. 4; H. Walker.

Scouts Broad Jump—L. Lybbert, 13 ft. 5 1/2; L. Nalder.

Junior Half Mile Relay—Raymond Second Ward Team.

Senior Mile Run—C. Scoville, R. Meldrum.

Open Half Mile Relay—H. Walker, G. Kirkham, B. Galbraith and F. Weaver won.

The Tennis events played at Magrath resulted as follows:—

The Ladies Singles were won by Miss Muriel Webster over Miss Miller of Magrath.

The Ladies Doubles were won by Misses Winnie Evesson and Lulah Paris of Raymond Second Ward over Misses Holman and Fletcher of Magrath.

O. Jensen of Magrath won the Gent's Singles over Milton Strong of Raymond.

Messrs. Jensen and Roblason of Magrath won the Gent's Doubles over A. Terry and R. Gibb of Raymond.

A unavoidable change in Orchestras at the Stake Mutual Dance Wednesday resulted in an eleventh hour call for Milt Strong and his Arcadians to play the job. They were scattered all over the country and were forced to start several men short. Before it was very late the entire instrumentation was present and the large crowd reported a very enjoyable evening.

By Gee

Horace A. Craig

MR. CRAIG, the vice-chairman of the Alberta Committee of the World's Grain Exhibition and Conference, is Deputy Minister of Agriculture for Alberta.

Born at North Gower, Ontario, in 1882, Mr. Craig received his education in the public and high schools of that Province; at the Ontario Agricultural College and the University of Toronto. In 1906 he was awarded a B.S.A. degree.

From 1906 to 1911 Mr. Craig was superintendent of fairs and institutes for the Province of Alberta, and from 1911 to 1915 superintendent of provincial fairs. He was appointed to the position of Deputy Minister of Agriculture in 1915.

Mr. Craig is a member of the Canadian Society of Technical Agriculturalists, as well as of numerous organizations interested in agricultural problems.

IT COULD BE MUCH WORSE

We know what will be the reaction of a great many of our readers when we state that things with all of us could be much worse. They are not very encouraging, we admit, but we still maintain that we are fortunate in this corner of Alberta that our prospects are as good as they are. We haven't heard of anyone going hungry, or without a place to sleep, and as far as we have been able to ascertain, when the spending urge is strong enough most people can find a little to spend. Not enough to true to satisfy all their desires, but then we never reach that stage anyway, but enough to get all the things we need, and apparently most of the things we really want.

When we read newspaper reports, and hear the reports of those coming into our district from out of it, and the discouraging pictures they draw, we cannot help but feel that while things are depressed and business here is less than at a standstill, we have fair prospects for a good chance of getting through the winter without any real hardships or suffering.

We are not in the midst of thousands and thousands of acres of barren land devoid of any kind of vegetation, as some districts report. Our livestock men are not killing livestock to keep it from starving and choking to death as has been done in places. We have hundreds of acres on the bread line as many districts have, and we could enumerate a great many more harrowing experiences that are reported that we are not experiencing. Crops burning out along side irrigation and unable to get water for them and so on.

So we say, we have much to be thankful for. We should be very patient and careful, and prepare for the coming winter. We have no one knows what the winter of 1931 will be. At the same time we should check our continual growing and complaining of hard times, rotten markets, and such things. Pull up the corners of our mouth a little and smile once in a while, before we forget entirely that there is any happiness in the world. Frowning and making oneself miserable won't better the price of wheat or make the export demand any greater. And because a true smile is no proof that he does not sense the gravity of the situation confronting us. More now, than ever, we need the courage to carry on with a smile, for as the old adage says, "The man worth while is the man that can smile when everything goes wrong." Let's try it.

News Notes

Born to Mr. and Mrs. L. M. Cox, a son, on Monday, July 6, 1931, at Miss Saxers Maternity Home, Lethbridge.

22,000 Oil Wells in Oklahoma and Kansas have decided to cease production until the price for crude reaches \$1 per barrel or better.

Mr. and Mrs. Don Wall, Mrs. Emma Harris and Mrs. Ruth Peterson left this week for Montana where Mrs. Wall's mother is very critically ill.

Gravel from Lethbridge south on the Cardston-Lethbridge Highway is just across the Coulee south of the Mennonite Colony. This coulee which has been somewhat dangerous is now just a plain stretch of straight road and can be negotiated without any change of gears at all. The gravel is still pretty loose.

All Europe awaited with bated breath the outcome of a fear of financial ruin in Germany the first part of the week. Falling prices of stock on Exchanges, heavy demands for withdrawal of deposits and restriction of foreign credits caused one bank to close its doors, and the government had financial leaders out trying to arrange loans to protect the nation. The Cabinet sat for nearly forty hours steady in an effort to find a way out.

COLLECT SEEDS FROM YOUR FLOWERS

(Experimental Farms Note)

Everybody loves flowers and every spring there is a rush to secure the necessary seed. One of the difficulties is obtaining seed of the particular

kind or color which bloomed last year. In many cases this can be solved by collecting seed of your flowers after bloom has finished.

Where seed is harvested from a few plants it can be cleaned at time of collecting, in most cases, by rolling between the hands and blowing out the chaff. There will be a number which will be on the green side when autumn frosts appear, in which cases the plants are cut off, wrapped in porous material, and hung in a ventilated room until thoroughly dry. These can be threshed at leisure.

Out of approximately four hundred varieties of flowers grown on the Dominion Experimental Station, Scott seed of over forty varieties is collected each year. Collecting commences about the end of July with Iceland Poppy and extends over a period of six weeks depending upon frosts.

In a season of approximately one hundred days frost free period the following flower seed can be collected:

Annuals: Asperula, Alyssum, Eranthis, Swan River Daisy, Calendula, Candytuft, Clarkia, Bridal Robe Chrysanthemum, Coreopsis, African Daisy, Larkspur, Lavatera, Linum, Linaria, Malope, Mignonette, Shirley Poppy, Tagetes, Sweet Peas, Antirrhinum, Alonsoa, Browallia, Cornelia, Heliotropium, Marigold, Nemesis, Salpiglossis.

Perennials: Aquilegia, Campanula, Delphinium, Dianthus, Gypsophila, Hesperis, Lysichiton, Poppies, Polemonium, Achillea, Cantanara, Thalictrum, feathered combine.

While Sweet peas have been mentioned, seed collecting is not advisable where flowers are on display because it shortens the blooming period.

G. D. MATTHEWS,

Dominion Experimental Station, Scott, Sask.

Here and There

The zoo at Toledo, Ohio has secured a mammoth sturgeon captured in Lake St. Clair, Canada. The fish weighed 230 pounds and was sold to Toledo for \$100.

Feeding bees on sugar and milk at the Government Experiment Farm at Agassiz, B.C., has resulted in an average of 23 pounds more honey than on ordinary diet. This may mean a further impetus to Canadian honey production.

Capital amounting to \$600,000,000 is invested in the development of 12,000,000 horse power electrical energy in the province of Quebec. Throughout Canada electric power development investments total \$1,400,000,000.

East and west of Suez also in London, Berlin, Paris and other famous centres, canned and frozen salmon from British Columbia was successfully marketed last year. Most of the shipments went from Victoria.

Monday, August 10, has been officially set as the opening date of the fourth "Buyers' Week" to be held in Montreal. The first Buyers' Week brought 251 buyers from all over the continent to Montreal; the third brought 1,100 buyers, indicating the growing success of the plan.

Individual holders of Canadian Pacific Railway common stock numbered 21,186 on September 2, 1930, and by the 1st June, 1931, there were 34,872 holders, an increase of 13,686. This shows the growing popularity of this stock since its split into four new shares for one of the old stock.

Unity of all peoples who live on the shores of the Pacific was the object behind the recent visit to British Columbia and Alaska of the Portland, Ore., Chamber of Commerce who took a seven-day cruise on board Canadian Pacific steamer Princess Charlotte in northern waters.

Completing a coast-to-coast holiday trip, Viscount Duncannon, son of Canada's Governor-General, the Earl of Bessborough, and his cousin, the Hon. Arthur Ponsonby, arrived in Vancouver over Canadian Pacific Lines from the east recently. They went on to a six-day trip of British Columbia waters aboard S.S. Princess Maquinna.

Ladies evidently also prefer blondes, judging by the decision of the Alpha Delta Pi sorority who elected Miss Margaret Jensen, blonde beauty of Hunter College, New York, as the sisterhood's most beautiful bathing girl at the convention recently held at the Chateau Lake Louise, in the heart of the Canadian Rockies.

Effective July 1, the Toronto Terminal division of the Canadian Pacific Railway was merged with the Bruce division of the company, the combined divisions being known as the Bruce division. R. W. Scott was appointed superintendent with headquarters at Toronto.

Visiting the Canadian Rockies for the second time in forty years, Colonel R. Stanley, of Alverstok, England, said he was astounded at the progress and development attained in that comparatively short period. He was a guest at the Banff Springs Hotel, which was not even thought of when he was here last as a guest of Lord Mount Stephen. (723)

News Notes

Magrath District will have an exhibition in the Lethbridge Fair next week.

Band practice next week will be held on the lawn of Ira McBride's home. All Band members please take notice and be there at 8:30 Mon. eve.

Lee Brewerton has been busy this week redecorating the interior of the Broadway Store, and says there are a number of alterations to be made as soon as they can be attended to.

A pilot and two passengers were killed in an air tragedy at Lloydminster on Sunday. The pilot died almost instantly when the plane nose dived into the earth. The tragedy happened in the presence of hundreds of horrified spectators.

CENSUS OF MERCHANDISING

Reports from the Dominion Bureau of Statistics indicate that the first step in taking the Census of Merchandising and Service Establishments has been successful. The census enumerators have secured the names and addresses of merchants in every section of the Dominion.

In August the next step will be taken when a schedule will be mailed to each address taken by the enumerator—the schedules varying with the type and size of business.

The widespread interest which is being taken in the merchandising census will insure the prompt and accurate completion and return of the Schedules. All types and sizes of merchandising and service establishments are realizing the importance and value of obtaining a comprehensive picture of distribution activities in Canada.

GREAT BRITAIN'S MOST NOTED MILLERS WILL ATTEND WORLD'S GRAIN EXHIBITION AT REGINA

SIR ALBERT HUMPHRIES AND SIR ROLAND BIFFIN TO TAKE PART IN CONFERENCE PROGRAM AT REGINA IN 1932

Two of Britain's most outstanding agricultural scientists in the persons of Sir Albert Humphries and Sir Roland H. Biffin will attend the World's Grain Exhibition and Conference to be held at Regina in 1932.

Dr. J. H. Grisdale, deputy minister of Agriculture for Canada and Chairman of the Conference Program Committee of the 1932 Exhibition and Conference reports that efforts of this Committee to secure leading scientific agriculturalists from different parts of the world to take part in the conference are meeting with gratifying success. Already many outstanding authorities have accepted the invitation to attend, read papers and lead discussions.

Sir Albert Humphries is one of Britain's leading millers and president of the Research Association of the National Association of British and Irish Millers. His particular interest in the World's Grain Exhibition and Conference is in the milling and baking section. Sir Albert Humphries has a record of public service almost unrivalled in the records of the milling industry of Great Britain. A few years ago he gained world-wide recognition for his experiments in connection with conditioning flour. During and since the war Sir Albert rendered conspicuous service in the field of research as well as in other matters of a more public nature which prompted His Majesty early this year to confer a knighthood upon him.

Sir Roland H. Biffin is head of the School of Agriculture, Cambridge University, and was associated with Sir Albert Humphries for a number of years in a series of researches designed to elucidate the nature and strength in wheat and flour. These activities resulted in what is now known as the "Humphries Biffin" definition of strength, the two factors nature of strength in flour. Sir Roland is also consulting botanist of the Royal Agricultural Society of England.

In announcing acceptance of Canada's invitation to take part in the 1932 World's Grain Exhibition and Conference by these two leading authorities Dr. Grisdale states their papers will constitute a contribution of inestimable value to the Conference phase of the 1932 undertaking.

Norman Willis, a farmer of the Mossbank district, Saskatchewan, has sown a special plot of four acres from which he hopes to select a wheat sample for exhibit at the World's Grain Exhibition and Conference, Regina, 1932. He secured registered seed after having his name on the waiting list of Wisconsin.

SIXTH FORTNIGHTLY CROP REPORT

(Issued by the Department of Agriculture, Province of Alberta, Edmonton, July 11th, 1931)

According to Telegraphic reports received by the Department of Agriculture on Friday, rain has been fairly general over most of the Province during the past ten days. In some districts there was as much as eight inches in the month of June. The dry weather of the Spring caused the early sown grain to head with short straw and rather thin stand. Later seedings are standing well, and all the crops have greatly improved with the recent rains and warm growing weather.

In parts of the South and south-eastern central districts the heavy winds and dry weather during the month of May caused serious damage, so that the wheat in these areas will be a light crop. In the districts west and east of Edmonton to the Saskatchewan border and through the north-eastern area the crops show a heavy stand. From present prospects it does appear that this district will have one of the heaviest crops it has yet produced.

Good conditions exist through the north-western section. Crops north of Peace River show strong growth with about 30 p.e. in head. South of the river more rain is needed, though nothing is suffering at present.

Grasshoppers have been active in small districts in Southern Alberta. The damage has not been extensive to date, owing to the fact that control measures have been adopted by the use of poison bait. Cutworms have done some damage in scattered areas.

Alfalfa cutting is under way in the irrigated districts of Southern Alberta and is a very excellent stand.

The hay crop generally will not be large. From prospects, however, there will be plenty of feed for live stock. The general crop prospect can be considered very fair.

Practically all travel between here and Magrath for the past week and a half or more has been routed by the old road, the road between here and Welling being pretty well torn up by construction gangs.

List of a well known registered seed dealer for nearly two years.

Richard H. Kleinsmith, Route 1, Omalaska, Wisconsin, has the honor of being the first entry from the United States in the oat classes of the World's Grain Exhibition and Conference to be held at Regina in 1932. Mr. Kleinsmith's entry reached the headquarters office of the organization a few days ago. Recently the first corn entry from the U. S. A. was received the entrant being Leo J. Winkler, after having his name on the waiting list of Wisconsin.

BED-TIME

The body works in a rhythm of activity and rest. The heart which is apparently never at rest does, in fact rest momentarily between each beat. We require periods of rest and relaxation, and the most complete rest is that secured during sleep.

Individuals differ and no hard and fast rule can be laid down as to the exact amount of sleep that is required by all. Some require more sleep than others; children, particularly need a great deal.

We know that a large number of persons would enjoy a greater measure of health, would do better work and would feel better if they had more rest. Too many starve their bodies of the time that is necessary for rest in order that they may have more time for work or play.

Failure to secure sufficient rest is particularly serious during childhood. Lack of rest is one of the chief causes of malnutrition. The child who does not have sufficient rest is not able to digest his food properly and so his nutrition suffers because he does not rest enough.

Parents cannot rely upon the appearance of the child to guide them with regard to his need for sleep. The thin, over-active child who never goes to bed, who is always on the go

and who looks bright and wide awake at any hour is the very child who is in urgent need of rest. He is burning the candle at both ends, and his general health and well being will suffer because of his lack of needed rest.

During the summer, children are often allowed to stay up late with the result that they do not get the amount of rest they require. Sleeping late in the morning does not make up for going to bed late in the evening.

The necessary hours of sleep in a room with open windows are:—

Age	Bed time	Hrs. sleep	Rising time
5-6	6:30	13	7:30
6-8	7:30	12	7:30
8-10	7:30	12	7:30
10-12	8:30	11½	7:30
12-14	9:00	10½	7:30
14-16	9:30	10	7:30

Children who are not strong, who are not gaining regularly in weight, need extra rest. They should lie down for one hour at least after the noon meal. They may not sleep, but the rest which they get while lying down is almost as good as sleep.

Rest, fresh air, play, and the use of milk, fruits and green vegetables make children strong and keep them well.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Work Must Be Paid for when Completed

Mrs. L. C. McKinney, 63 years of age, passed away at Claresholm on Friday last, death being due to heart failure. She had a very distinguished career, and was Vice-Pres. of the Women's W. C. T. U., and was the first woman in the British Empire to hold a seat in Parliament. The funeral was held on Monday.

S. I. May was in Magrath on business on Tuesday afternoon.

Mr. and Mrs. J. D. Quinton and children were here Sunday visiting with Mr. and Mrs. S. I. May and family. Mr. and Mrs. E. S. Gourley and family. June May went back with them for a few days' holiday in bridge stakes will meet in conference one week earlier.

News Notes

C. R. Wing and W. P. Litchfield wore at Stirling on Sunday evening on Mutual work.

Mrs. Fred Lind returned home this week after undergoing an operation in Lethbridge.

LOST—Between Broadway and 3 miles east of Raymond, spare tire 21X5.25. Return to Geo. W. Evans, Raymond.

Mr. and Mrs. Josiah Holland of Cardston spent Sunday with Mrs. Holland's parents, Mr. and Mrs. Geo. O. Court and family.

Mr. and Mrs. Byron Vance and Mr. and Mrs. S. I. May were in Stirling on Sunday night on returned missionary work.

Edson Wall is recovering from a severe attack of Quinsy. His many friends are glad to see him around again.

A meeting is called for Sunday to further discuss the Galt Hospital district scheme. The meeting will be held at 3 p.m. in the Town Hall and all interested parties are invited to attend.

O. S. Longman and wife, and Mrs. Longman's mother were in Claresholm on Monday attending the funeral of Mrs. L. C. McKinney. Mrs. Longman's sister is the wife of Mrs. McKinney's son.

To cut down on the cost of the Dole, the English Parliament is considering the spending of \$18,000,000 to erect 40,000 homes in rural districts to house workers and those who want a chance to earn their own living.

Conservative members of the House at a Convention last week decided to ask for a Special Session of the Provincial House soon to consider the Wheat Pool question and unemployment. Premier Brownlee pronounced the suggestion impossible.

A new ore, which shows an assayed value of \$1,200.00 per ton has been discovered on Echo Island, in Great Bear Lake, in the northern part of the Province. The prospector who made the discovery flew to Edmonton to file his claim.

Quarterly Conference dates for the Taylor Stake are Saturday and Sunday, August 22 and 23, and will be a Convention Conference for the Relief Society and the Mutuals according to present plans. The Alberta and Lethbridge Stakes will meet in Conference one week earlier.

DON'T WAIT TILL BEETS SUFFER FOR WATER—BETTER IRRIGATE A LITTLE EARLY THAN TOO LATE

(By George Stewart and D. W. Pittman, Utah State Agricultural College)

One of the important principles in the intermountain region is to take special precaution to see that young beets are not allowed to suffer for water early in the season. Sometime at a depth of 6 inches the subsoil may be well supplied, but due to a sudden spell of dry weather the surface may lose its moisture and the beets' roots be unable to penetrate this dry top layer. Plants cannot possibly penetrate a soil if their roots cannot obtain water.

It is important therefore to provide enough water to connect with the subsoil moisture. Usually the proper method is to give light irrigations placed as close to the beets as is reasonably possible.

The first major irrigation should be applied before the beets show much wilting. It is always safe to irrigate a little too early rather than a little too late. An old idea, not substantiated by experimental evidence, was that withholding irrigation caused beets to send their roots into the subsoil after deeper waters. Where this practice of delaying irrigation has been followed, the results have usually been unsatisfactory because roots can develop properly only under conditions of medium moisture supply.

Three fine-grained soils usually hold considerably more water than porous ones, the amount of water to be applied in a single irrigation is greater on heavy and clayey soils than on sandy and gravelly types. A farmer who has handled his land for some years knows how to irrigate in order to get the water deep into the soil. Sometimes it is necessary to irrigate slowly for seven hours in order to permit penetration. Sometimes, on extremely porous soils, the land is saturated almost as soon as the water reaches the bottom of the field.

Proper manuring, fall plowing and good rotation tends to avoid the undesirable features of both of these extremes and to bring about in the soil the desirable medium condition. Soil determines irrigation practice. On moderate to heavy deep loam soils, a good irrigation is ordinarily 4 to 6 inches, which takes several hours to soak into the soil and which should be applied every 12 to 20 days. On more porous or more shallow soils 2 to 4 inch irrigations are about all the soil can retain without either deep percolation or partly swamping the land.

When smaller quantities are applied it is usually necessary to apply them at more frequent intervals, such as 8 to 12 days. Under certain conditions it has been found that weekly irrigations give beneficial results, but such frequency of application naturally involves a greater labor cost in applying the water.

Subsequent irrigations follow at more or less regular intervals throughout the season. The important thing is to maintain an intermediate condition of soil moisture, never allowing it to become over dry, and, if possible, to avoid its becoming over wet. As autumn approaches and the beets become full-sized, it is usually necessary to get the water deep into the soil; under favorable conditions, the roots are 4 to 5 feet deep by this time, and it is desirable to have the entire root zone at work.

News Notes

G. H. McRae of the Mid West Paper Sales was in Raymond on Thursday of this week.

Mrs. Claude Brown and Mrs. Taylor of North Dakota have been visiting with Mrs. J. D. Brown for a few days.

Gravel hauling was started Wednesday morning working west to join up with what has been done from the Coulee east. The stretch from Spring Coulee to a little east of Bradshaw now has its second coating, and the Bradshaw-Magrath stretch will soon be finished.

Australia Trade Pact is Tabled on Tuesday opening up a potential market of 630,000,000 annually of Canadian goods. The date of its taking effect will be set by proclamation of both governments later on. Preventive officers uncovered an illicit still at Port Colborne, Ont., recently with a capacity of 1,000 gallons per day. One of the largest of its kind in the world in years. It was located in an old garage building.

Thumb Nail Sketches By Cy

World Beaters

CHAMPION of the world! Every country boasts of one champion in something or other.

Denmark has the world's champion wireless enthusiasts. Forty per cent of Danish families own wireless sets. The world's largest wireless station is at St. Assise in France. London, England, is the largest city in the world, but the greatest railway facilities are in Belgium, where there are more miles per unit of area than of any other country. London, however, has become the flying university of the world. More than a hundred students from many foreign countries were trained there last year. Florida walk in New Orleans, U.S.A., is 488 feet from property line to property line—the widest street in the world. The Champs Elysees in Paris, France, is 250 feet wide, Reeper Bahn in Hamburg, 210 feet, and the Ring Strasse in Vienna, 185 feet.

The world's greatest Grain Exhibition and Conference will be held at Regina, Canada, in 1932, but probably the "daddy" of all the world beaters, at least from a novelty point of view, is the world's biggest drink.

It appears that three hundred years ago last year Rothenburg, Bavaria, was compelled to surrender to a besieging army. The general was about to issue orders for the destruction of the city. Women and children begged for mercy. The general retired to the Court House and while there became more favorably disposed towards those who pleaded with him. After drinking from an enormous flagon, he said, "If any of you senators can empty this jug in one draught I will spare your town." The challenge was accepted by the Burgomaster, the feat accomplished and the city saved. Ever since then, every day at noon, mechanical figures on the town hall clock repeat the performance. On the three hundredth anniversary, which came last year, the Burgomaster was called upon to repeat the feat in person. He raised the same old flagon to his lips and drank its contents in one long draught—probably the biggest drink on record. It contained three and a half quarts of beer.

STELLARENE THE BLU-GREEN GAS

That new Motor Fuel which will give you a new set of Ideas regarding your Car's Performance

Here's what Stellarene Gives You
